**Examiners Amendment**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Sova and Jun Lee on 05/08/2008.

The claims have been amended as follows:

In claim 2, delete from line 5 "said proximal member having an",

In claim 2 delete lines 6-21, and insert following line 5:

"wherein the proximal member comprises

- a. a main body section, the main body section having a first wall substantially perpendicular to the longitudinal direction, the first wall being on the side of the main body section that is further from the elongated member in a longitudinal direction,
- b. a plate extending in a longitudinal direction from the first wall, in a plane substantially parallel to both the longitudinal axis and a transverse axis of the handle, the transverse axis being substantially perpendicular to the longitudinal axis,

Art Unit: 3724

- c. an inner upstanding wall, extending substantially perpendicular to the plate, that is arcuate in the plane defined by the longitudinal and transverse axes of the handle,
- d. an outer upstanding wall, extending substantially perpendicular to the plate, that is arcuate in the plane defined by the longitudinal axis and the transverse axis of the elongated member, and the outer upstanding wall is disposed further away from the handle and the bulk section than the inner upstanding wall,
- e. the inner upstanding wall and the first wall of the main body section defining at least a partial void therebetween,
- f. an arcuate lip extending in the longitudinal direction beyond the outer upstanding wall, and formed contiguously with the plate, for slidably engaging a curved cutting area
- g. a blade, having a first and second cutting edge, retained in arcuate configuration between the inner and outer upstanding walls, the blade extending beyond the transverse end of each upstanding wall, to expose the first and second cutting edges of said blade for cutting when relatively moved in the transverse direction; and"

In claim 3 line 2, delete "arcuately formed blade member" and replace with "blade"

In claim 4 line 2, delete "arcuately formed blade member" and replace with "blade"

In claim 15, line 3, delete "a second end thereof" and replace with "a second wall opposite the first wall of the main body portion"

***Allowable Subject Matter***

2. Claims 2-5, and 13-16 are allowed.
3. The following is an examiner's statement of reasons for allowance: by setting forth a comprehensive combination of limitations including the shape of blade support structures, and its position relative to the handle, and an arcuate lip for guiding a curved surface, there is no art of record which motivates, suggests or has any rational reason presented or inferred thereby which examiner knows of which can be construed to infringe the claims. The closest manicuring devices known do not have similar features, and there are no other classes of invention known at this time which would be informative to an obviousness inquiry.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
